

CANCER IN THE FIRE SERVICE:

Where we are and Where we need to be

Important Changes Needed Now

Cancer in the fire service is increasing every year. We lose more firefighters to cancer than cardiac related diseases. It is time to make a change. Through research, we have determined that if we correct our issues, an opportunity exists to extinguish cancer.

We will teach the three “A’s”:
Awareness, Acceptance, and Action.

It takes courage to make these changes.

Are you courageous enough to engage in these efforts?

**80 firefighters buried in
2015 from Cancer**

**The three “A’s”:
Awareness,
Acceptance, Action**

**How are we getting
Cancer? Not what you
think.**

**New PPE and Overhaul
Protocols**

**Learn about new
technologies available
and how to implement
them**

**Limerick Fire Company
390 West Ridge Pike
Limerick, PA. 19468**

**March 8th, 2017
1830 - 2130**
